

Shield Solutions® Bug Wash Directions

Direct Spray and Wipe

1. Generously spray Shield Solutions® Bug Wash on surface.
2. Do not dilute.
3. Gently wipe the bugs off of surface with a Micro Fiber Towel.
4. Use care to avoid creating scratches on surface.
5. For best results apply immediately after bugs are found on surface.

Pump-up Foam Sprayer Application Method

6. Attach the white foam tip to the spray nozzle (if not attached).
7. Fill the container to the 1.5lt mark with Shield Solutions® Bug Wash. Pump 15-20 times to achieve desired pressure.
8. Spray a generous amount of foam onto the desired area to be cleaned. Let the foam dwell as long as it will cling.
9. Gently scrub the foamed area with a Shield Solutions® Telescoping Brush. Rinse well and dry with a Micro Fiber Towel.

** For best results, do not rinse the foamed area but rather follow with a complete wash with Shield Solutions® Vehicle Wash. Rinse thoroughly, repeat if necessary.
